

# Drug Abuse Project

## Architecture Design And Planning

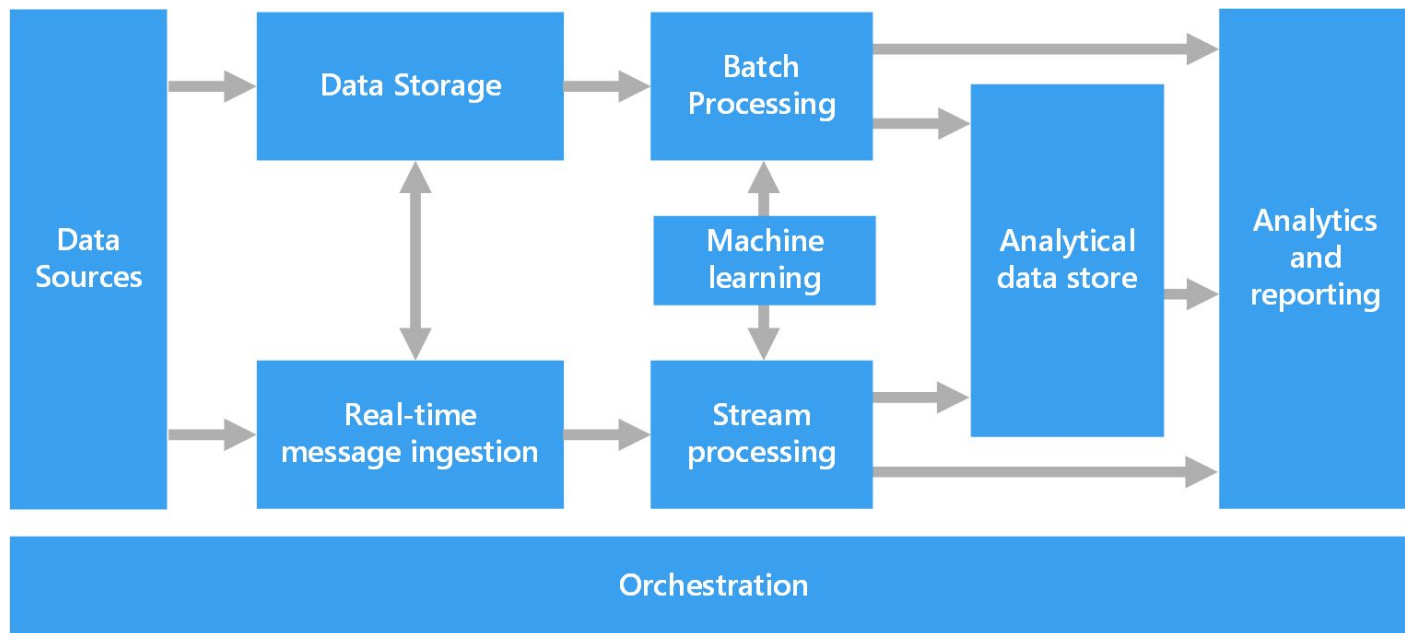

Julina Maharjan

May 20, 2020

# Architecture Design

# Approach

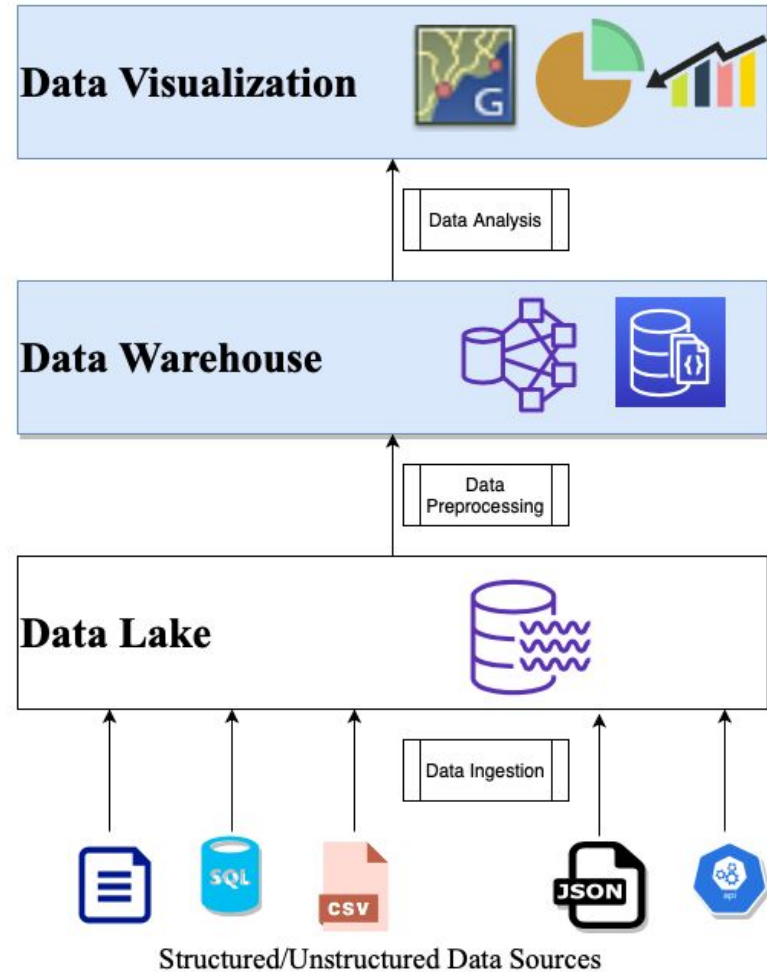

## Big Data Architecture Solution

# Main Consideration

- Big Data
  - Varieties of Data (Structured/Unstructured)
  - Volume of Data
  - Velocity
- Scalable Software

# Abstract Design

Data Analysis

Data Preprocessing

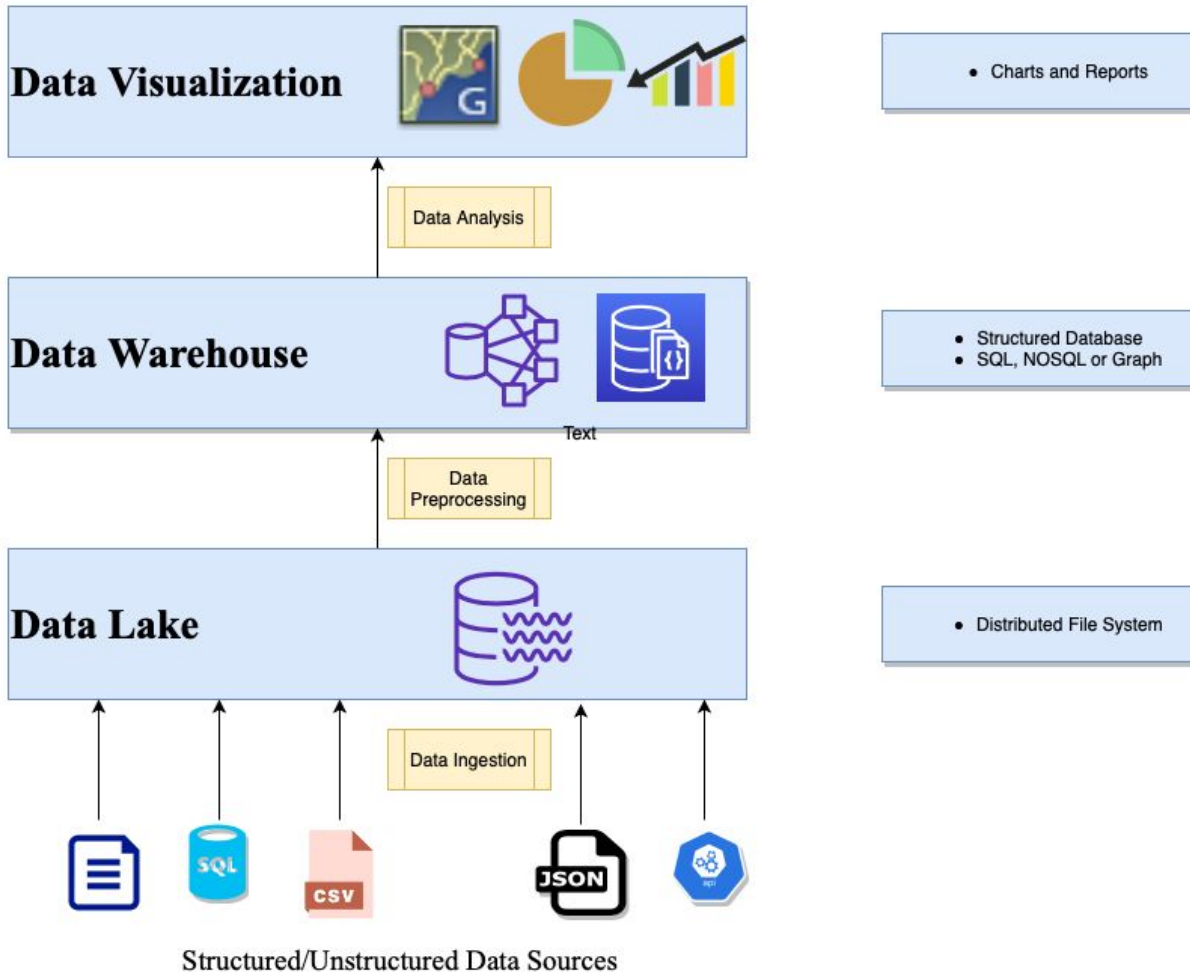

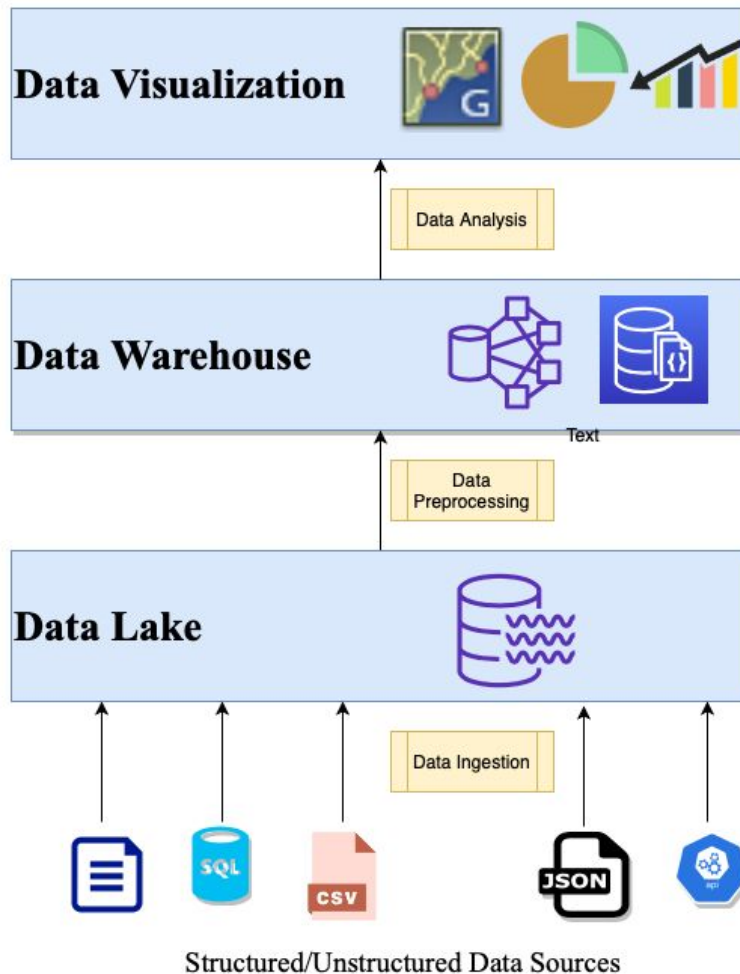

Data Ingestion

- Aggregations & Ordering
- Timeseries
- Various Algorithms (AI)

- Distributed Processing (Batch)
- ELT: Clean, Normalize, Transform, Store to New DB

- Charts and Reports

- Aggregations & Ordering
- Timeseries
- Various Algorithms (AI)

- Structured Database
- SQL, NOSQL or Graph

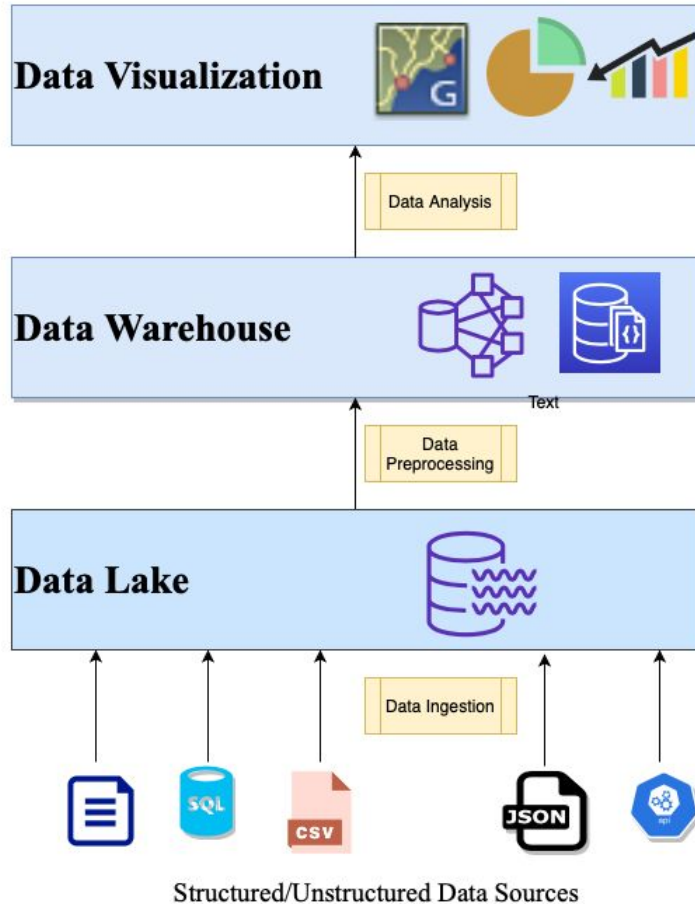

- Distributed Processing (Batch)
- ELT: Clean, Normalize, Transform, Store to New DB

- Distributed File System

API

Pull -Subscribe

## Tools

- D3JS
- Chart tools

### Algorithms -

- Lyrics Mining
- Sentiment Analysis (NLP-BERT)

### Spark Data Processing -

- Scala/Python

HDFS cluster

- Tweet API Crawler

- Tweets
- Hospitalization Data
- Census Data
- Geo-Location Data
- Lyrics

# Plannings

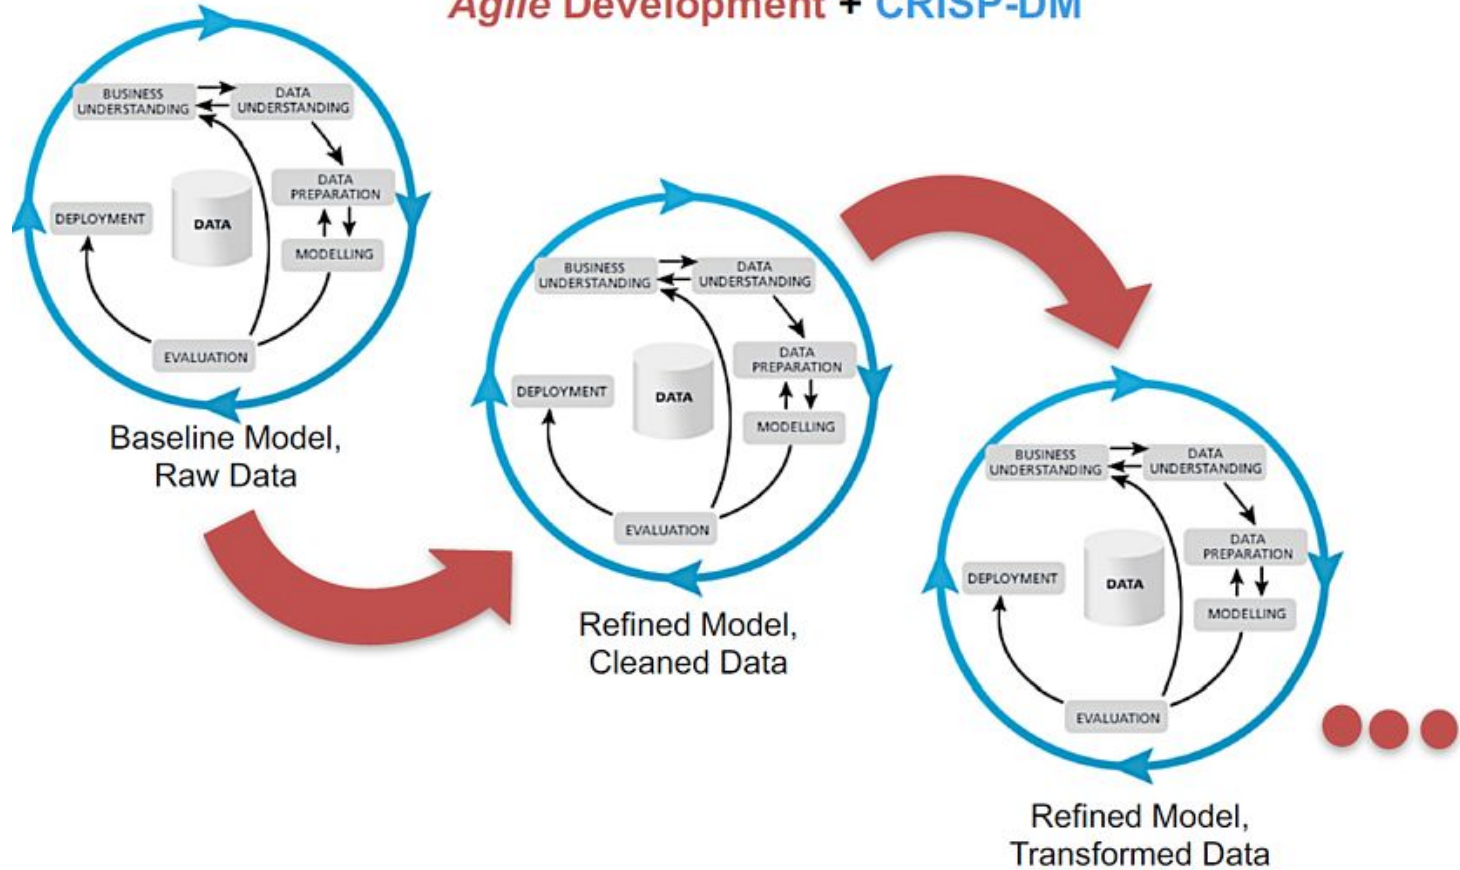

# Methodologies : CRISP DM

- Cross-industry standard process for data mining

A

## Agile Development + CRISP-DM

# Monthly Timeline

May 2020	June 2020	July 2020
<p><b>Data Warehouse</b> (Tweets, Hospitalization Data, Census Data, Geo-Loc Data, Lyrics)</p> <ul style="list-style-type: none"><li>• Cluster Set-up</li><li>• Package Installation</li></ul> <p><u>For each data</u></p> <ul style="list-style-type: none"><li><input type="checkbox"/> Data Pre-processing Clean, Normalize, Store</li><li><input type="checkbox"/> Data Modelling</li><li><input type="checkbox"/> Writing to DB</li><li><input type="checkbox"/> CRUD Operations</li></ul>	<p><b>Data Visualization</b></p> <ul style="list-style-type: none"><li>• Front End Design</li><li>• Reports</li><li>• Heatmaps, Charts</li></ul> <ul style="list-style-type: none"><li><input type="checkbox"/> Framework installation</li><li><input type="checkbox"/> Reporting</li></ul>	<p><b>Data Lake</b></p> <ul style="list-style-type: none"><li>• Operational tasks</li><li>• Deployment</li></ul> <ul style="list-style-type: none"><li><input type="checkbox"/> API Crawling</li><li><input type="checkbox"/> Set up HDFS</li><li><input type="checkbox"/> Read data from HDFS and write to Data Warehouse</li><li><input type="checkbox"/> Automations</li></ul>
